

## WATERSTOP® XP

### EXPANDING WATERSTOP WITH XP TECHNOLOGY FOR CONCRETE CONSTRUCTION JOINTS

WATERSTOP® XP is the next generation of waterstop that expands upon contact with water to form a positive seal to stop water ingress through cast-in-place concrete construction joints and around pipe penetrations. Through the use of the patented XP technology, WATERSTOP® XP is proven effective in a wide range of contamination environments, including high-saline conditions. Its flexible design also makes it effective for both horizontal and vertical joints.

#### APPLICATIONS

Vertical and Horizontal  
Nonmoving Concrete  
Construction Joints

New to Existing Construction

Irregular Surfaces

Around Through-wall  
Penetrations, e.g., Plumbing  
and Utility Pipes

Around Piles, H-Pile Supports and  
Other Detailing Applications

WATERSTOP® XP is manufactured in lightweight, flexible coils and designed to replace passive PVC/rubber dumbbell waterstops — eliminating the requirement of special pieces, split-forming and seam welding.

## Exceptional Waterproofing Performance:

### Protection from Water Ingress:

- Can expand several times its volume to fill voids.
- Roll ends naturally join together to form one continuous waterstop.
- Effective seals pipe penetrations that PVC waterstops cannot efficiently seal.
- Proven effective in structures under continuous or intermittent hydrostatic pressure.

### Protection from Contaminants:

- XP technology resists a wide-range of contaminants, including high-saline conditions and organic solvents.

## Installation Benefits and Features:

### Fast and Easy:

- Manufactured in lightweight, flexible coils.
- Can be easily installed by a single worker.
- Requires no special pieces, seam welding or split forming.

### Versatility:

- Can be adhered in place using CETSEAL® or mechanically secured with REVO-FIX® and fasteners.
- Pliability allows installation around through-wall/slab and pipe penetrations.
- Easily transitions from horizontal to vertical applications to form a continuous waterstop.

Used with CETCO COREFLEX® or ULTRASEAL® XP membranes, WATERSTOP® XP qualifies for the HydroShield™ Quality Assurance Program.

Protect your structure from water ingress with the industry's leading quality assurance program. This proven, systematic approach provides a no-financial-limit warranty for 100 percent, non-prorated protection for the entire term of the warranty.
